KELSEY'S

Hardy American Plants Rhododendrons, Azaleas, and Specimen Evergreens

I. Catalog of BOXFORD NURSERY

Boxford, Massachusetts

II. Catalog of HIGHLANDS NURSERY

3,800 Feet Elevation
Pineola, North Carolina

AT BOXFORD NURSERY (East Boxford, P. O.), on the Georgetown branch of the B. & M. R. R., may be seen growing the choicest collection of specimen nursery stock, selected for the most discriminating buyers. Special attention is given to hardy native plants, which must always be the basis of successful permanent plantings.

SPECIMEN STOCK. There is a growing demand for fine specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas, and other evergreens, and Boxford Nursery is established to supply this need.

Landscape architects, park and cemetery superintendents, and the owners of large estates will find it of great advantage to visit Boxford Nursery and personally select material in the nursery row.

PRICES are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely underground. Frequent transplanting, and handling specimens with adequate, burlaped balls, mean success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery; and "cheap" stock will not be handled or sent out. **The best is always the cheapest.**

HIGHLANDS NURSERY SHIPMENTS are made from Pineola, N. C., freight station, and prices in this list are made on this basis. Freight and express rates quoted on request. Via Norfolk steamship lines, deliveries to northern and eastern points are quick and rates are low.

SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM and KALMIAS are from my special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South, from high altitudes. **"Collected" Rhododendron catawbiense** comes only from the South.

MY NURSERIES ARE UNIQUE, being the first to grow Native American Ornamentals, and having the only large and complete stock of Hardy American Plants in existence.

SHIPPING BEGINS IN AUGUST, when I send out large Rhododendrons, Kalmias, and other evergreens, and bulbs and herbaceous plants, general stock going out in October and November; and in spring from about March 1 to May 15. Give shipping instructions, unless you wish to leave it to me, when I use my best judgment, but **assume no risk.**

EXPORT SHIPMENTS reach the most remote countries in perfect condition. I have exported for over twenty-five years, and know how to pack. Quarantine and the great war, however, have left open practically only Holland and Great Britain to our shipments.

DESCRIPTIVE CATALOGS, illustrated, are mailed on request, and advice on the right way to grow Rhododendrons, Azaleas, and other native plants is gladly given. Send for "How to Grow Rhododendrons Successfully."

VISITORS ARE ALWAYS WELCOME. Boxford Nursery is easily reached by train or automobile, and Mr. Kelsey will be glad to meet prospective customers at the nursery by appointment.

A visit to Boxford Nursery during the blooming season of Rhododendrons and Azaleas is especially worth while.

CATALOG OF BOXFORD NURSERY

Catalog of Boxford Nursery

NOTE: All plants are transplanted and nursery-grown unless plainly marked otherwise.

The larger sizes are always shipped with balls and are burlaped, which means they will grow.

Special selection is always charged at special price. The prices in this catalog cover the average good grade as they run in the nursery row. Where specimens are picked, a price will be made to fit the specimen.

NOMENCLATURE

The botanical (scientific) names of Trees, Shrubs, and Woody Vines in this catalog conform to the 1917 Official Code of Standardized Plant Names, adopted and published by The American Joint Committee on Horticultural Nomenclature, as first printed in L. H. Bailey's "Standard Cyclopaedia of American Horticulture," Vol. VI, 1917.

Evergreen Trees and Shrubs

communis aurea. 2 to 3 ft.....	2 00	15 00	
3 to 4 ft.....	3 00	25 00	
communis depressa. PROSTRATE JUNIPER. Without doubt this is the best prostrate form of Juniper for ground-cover. It is at home on sandy or gravelly hillsides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more. In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the open. It varies in form from the completely prostrate type to the ascending type. 2 to 4 feet high. We have several thousand transplanted specimens to select from, up to 8 feet in diameter.	Each	10	100
6- to 12-in. spread.....	\$0 50	\$4 00	\$30 00
1- to 1½-ft. spread.....	75	6 00	50 00

Pieris (Andromeda) floribunda. These plants are feathered to the ground and a mass of buds. It is doubtful if there has been such a stock as these plants ever offered before in this country. It is strictly American-grown stock and is not troubled with the peculiar wilting off which affects Dutch-grown stock.

caroliniana. CAROLINA HEMLOCK. The only stock of large <i>T. caroliniana</i> in existence that we know of. Specimens from 4 feet up are feathered to the ground and compact and dense. They have been transplanted until they have very large solid balls which are lifted with the plants. The particular attention of nurserymen is called to the fine young stock of transplanted plants which I can offer in 1,000 and 10,000 lots. It is the coming American evergreen for the finest plantings.

CATALOG OF BOXFORD NURSERY

DECIDUOUS TREES AND SHRUBS, continued

Salix. Our collection of Willows covers almost all the species that are planted in the Arnold Arboretum, and we have others in smaller quantities that have lately been discovered in China and elsewhere. Many of the Willows are charming dwarf and semi-prostrate shrubs, notably beautiful, with bright yellow, brown, and green branchlets, or sometimes covered with a white bloom. The catkins are extremely showy and range from tiny balls of down to golden yellow spikes. Most of them thrive both in dry soils and in very moist locations.			
	Each	10	100
acutifolia. 15 to 25 ft. Branchlets dark colored, covered with bloom; long narrow leaves.			
1 to 2 ft.....	\$0 25	\$2 00	\$18 00

LILACS ON THEIR OWN ROOTS

Fine collection of some of the best and newest hybrids in specimen stock. It is only recently that **Lilacs on their own Roots** were obtainable.

Ordinary stock is **grafted on Privet**, which "suckers" badly, often crowding out and killing the grafted top and leaving a Privet instead of a Lilac. The Lilac is the queen of spring-flowering shrubs, and the new hybrids mark an epoch in horticulture. For a tall hedge or screen there is nothing better than the Lilac, and for this purpose the old-fashioned white and purple sorts make a charming combination.

D—double varieties; S—single varieties.

KELSEY'S *Hardy American Plants* *Rhododendrons and Azaleas*

CATALOG OF HIGHLANDS NURSERY

Abies fraseri

Catalog of Highlands Nursery

PART II

At my Highlands Nursery, Pineola, North Carolina, 3,800 ft. elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoës, Kalmias, and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of rare American plants of unquestionable hardiness—the best for American gardens.

The Carolina Mountains is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery.

DECIDUOUS AND EVERGREEN Trees, Shrubs, Woody Vines

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise.

This is a catalog of nursery-grown plants growing at my Highlands Nursery, Pineola, North Carolina.

Evergreens are marked with a star (*)

KELSEY'S HARDY SPECIMEN EVERGREENS

CATALOG OF HIGHLANDS NURSERY

Rhododendrons and Mountain Laurel "COLLECTED" CLUMPS BY THE CARLOAD

Delivered at your station. To be shipped from point determined by me

For the area covered and effect produced, a carload of Rhododendrons or Kalmias, offered below, is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept cheap stock, thrown into cars without burlaping, and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end. While fine results may be had from "collected" Rhododendrons, particularly if purchased from a reliable source, where greatest care is used in digging and handling, results are never so sure as when nursery-grown stock is used.

Rhododendron Catawbiense "Collected" Clumps

Each plant collected from the open. Prices, delivered f. o. b. your station, if east of the Mississippi River. These prices are net and subject to no discount. Burlaping is charged extra, if desired.

Car containing 200 clumps, 1 to 3½ ft., for.....	\$280 00
Car containing 300 clumps, 1 to 3½ ft., for.....	380 00
Car containing 400 clumps, 1 to 3½ ft., for.....	480 00
Car containing 600 clumps, 1 to 3½ ft., for.....	600 00

Other combinations and sizes quoted on request.

Rhododendron maximum "Collected" Clumps

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River. Collected from open ground. These prices are net and subject to no discount. Burlaping is charged, if desired.

Car containing 300 clumps, 1½ to 4 ft., for.....	\$300 00
Car containing 400 clumps, 1½ to 4 ft., for.....	375 00
Car containing 600 clumps, 1½ to 4 ft., for.....	500 00

Other sizes or combinations will be made up to suit customers. It is far cheaper to buy my kind at slightly increased price, and have plants that will grow.

Rhododendron maximum and R. catawbiense "Collected" Clumps by the carload

Mixed cars, delivered free at any station east of the Mississippi River. These prices are net and subject to no discount. Burlaping is charged extra, if desired.

Car containing 150 maximum and 150 catawbiense, collected as above. 1½ to 4 ft., clumps,—total of 300—for \$400. Car containing 250 maximum and 250 catawbiense, 1½ to 4 ft., clumps—total of 500—for \$550.

Kalmia latifolia (Mountain Laurel)

"Collected" Clumps by the carload

Highest-class clumps collected from the open, delivered free at your station, if east of the Mississippi River. These prices are net and subject to no discount. Burlaping is charged extra, if desired.

Car containing 400 clumps, 1 to 3½ ft., for \$375. Kalmia may be added to help fill any Rhododendron car at 90 cts. per clump, not less than 100 clumps in shipment.

The above "Carload" offers are made with a view of furnishing a variety of sizes that will permit of naturalistic grouping.

Have your clumps burlaped. It is the only proper way to handle specimen plants. See next page for cost

KELSEY'S *Hardy American Plants* *Rhododendrons and Azaleas*

CATALOG OF HIGHLANDS NURSERY

"Collected" Rhododendrons and Kalmias by the 100 and 1,000

The number that may be shipped in a car varies largely, depending on sizes. The minimum weight allowed per car is 16,000 pounds, with a freight rate from my Highlands Nursery to Baltimore of \$84, New York \$88, and Boston \$96.

A car may easily be loaded much heavier, with proportionate increased freight charge, but not increasing the cost per plant.

A full car travels with greater safety than one with a small load.

All "Clumps" offered below are collected with a good ball and are burlaped separately.

 Burlaping is charged at cost, as below. We always burlap clumps unless expressly ordered otherwise.

PRICES OF "COLLECTED" CLUMPS OF RHODODENDRONS AND KALMIAS

Rhododendron catawbiense.	Each	10	100	1,000
1 to 2 ft., "collected" cl...	\$1 50	\$10 00	\$80 00	\$700 00

3 to 4 ft., "collected" cl...		17 50	150 00	1,300 00

BURLAPING

It always pays to burlap the larger sizes of trees and shrubs, especially evergreens, even if planted the same day. No charge is made for burlaping single plants as quoted. Otherwise burlaping is charged as follows:

- 2 to 3 ft., clumps and trees, 8 cents each
- 3 to 4 ft., clumps and trees, 10 cents each
- 4 to 6 ft., clumps and trees, 15 cents each
- 6 to 8 ft., clumps and trees, 15 cents each and up

and larger sizes in proportion. **Unless instructed to the contrary,** I assume customers desire proper burlaping, which will be added to the invoice.

TERMS

Terms cash, or satisfactory references from unknown parties. Accounts due the first of each month, unless by special arrangement. 5 at 10 rates; 50 at 100 rates; 500 at 1,000 rates.

Prices Quoted are for grades as specified. For extra selection an extra charge is made to fit the value of the plants.

Send Foreign Remittances by Postal Money Order, drawn on Salem, Mass., post office; or by New York or Boston Exchange. An American dollar equals four shillings, four marks, or five francs.

Packing charges, except burlaping, free, at prices in this catalog for shipment by freight or express. Team and auto delivery to North Shore or Boston points at reasonable cost.

GUARANTEE

No guarantee, expressed or implied, is made that stock will grow whether planted by me or not.

Having no control over after treatment of plantings, or over weather conditions, it is obvious that purchaser must assume all responsibility after delivery in good condition.

All shipments travel at consignee's risk, and transportation companies must be held liable for damage in transit.

Claims for errors must be made on receipt of goods. If there is any mistake or fault on my part it will gladly be rectified.

Landscape Forestry. Evergreen seedlings and transplants in large quantities are grown at both nurseries in the choicest species. We do Landscape Forestry, treating woodlands from a **Landscape standpoint** as well as for commercial uses. Mr. Kelsey is open for consultations and engagements. Always address,
